GlowCore DC extension v1.0
# Quick Start Guide

Learn how to power your GlowCore with a DC power supply.

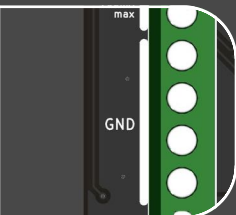

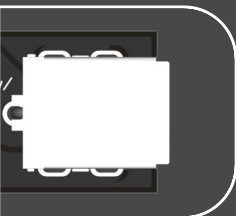

open source hardware

Step 1:

Connect the **5V** pin of this extension with the **5V IN** pin of GlowCore, using a wire. Use a thick wire and make sure it is screwed in securely.

Step 2:

Repeat the same for the **GND** pin and connect it to one of the **GND** pins of GlowCore.

Step 3:

Connect a 5V DC power supply to the DC connector and power everything up.
